

Test and Break-In Engineer (m/f/d)

Our Client:

A globally renowned manufacturer of high-end sports cars is looking for a skilled professional to join their team. Become part of a company that sets standards in the automotive industry with performance and innovation.

Your Location:

Rome, Italy – with global assignments in fascinating yet challenging regions.

Your Responsibilities:

Conduct test and break-in drives to ensure vehicle quality and optimization.

Analyze and document vehicle performance under various climatic and geographical conditions.

Collaborate closely with development and production teams.

Monitor compliance with technical and safety standards.

Your Profile:

Degree in Automotive Engineering or a similar field.

At least 5 years of professional experience in automotive manufacturing, preferably in sports or premium vehicles.

High willingness to travel (approximately 80%) – even to extreme climatic regions.

Physical resilience and the ability to perform under pressure.

Passion for vehicles and precision in your work.

Our Offer:

An excellent compensation package that matches your qualifications and experience.

An exciting role within a globally active company.

The opportunity to prove your expertise on an international level.

A dynamic, innovation-driven work environment.

Are you ready to help shape the future of automotive manufacturing? We look forward to receiving your application!
